

Exchange email setup on Android devices in the Outlook App:

1. On your Android device, open the **Outlook App** and press on Get started:

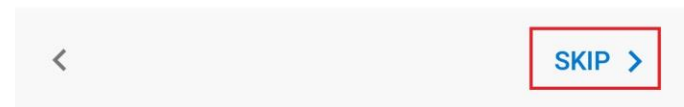

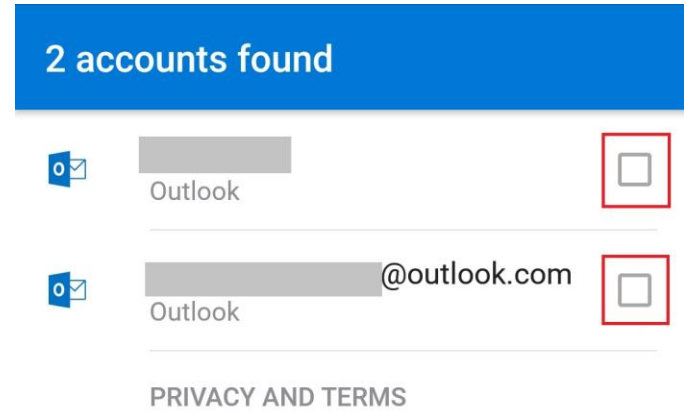

Outlook

A better way to manage your email.

 Enable GCC

2. If you also have other email accounts on your phone, when you open the Outlook App, those accounts will appear with the option to add them to Outlook. Uncheck the accounts and press **Skip**.

3. In the next window, type in your **full email address** and press **Continue**:

Add account ?

Enter your work or personal email address.
